Argentium Silver Foundation Course

Argentium Silver is a wonderful precious metal with a range of superior properties that gives a new dimension to working in 'real' silver.

Free from the restrictions of firestain, and with the unique ability to be fused to itself and other metals amongst its many benefits - this opens up a world of opportunities for jewellers and silversmiths.

Who is the course for?

This Foundation Course is for schools, colleges, universities and individual designer/makers, from beginners to professionals - anybody, of any age, with an interest in silversmithing or jewellery making. All you need to get started is a few simple tools and a space to work, whether it be a workbench or a kitchen/dining room table.

Introducing you to Argentium Silver...

- High silver purity
- Firestain / firescale free
- Brighter, whiter colour
- Excellent tarnish resistance
- Fusible to itself & other metals
- Greater strength & durability
- Can be heat hardened
- Hypoallergenic
- Responsible

Module 1: Fusing

Module 2: Granulation

Module 3: Heat hardening

Module 4: Slumping

Module 5: Design

Modules

Our five Foundation Course Modules have been designed to explore the unique and superior working properties of Argentium Silver - teaching a diverse range of skills and techniques to create wearable items of jewellery, whilst developing an excellent jewellery making foundation to build a future upon.

Online video tutorials & technical assistance

Each Module is supported by online video tutorials, presented by Certified Argentium Silver Instructors. If further information is required, our Instructors are available to offer technical advice.

For schools, colleges & universities

Argentium Silver is the perfect material to introduce novice jewellers, designers and silversmiths to working in a precious metal. Each Foundation Module enables students to enjoy the fun of being creative in Argentium Silver - helping to develop imagination, design ideas, practical skills and inspire a love of making. For more experienced students, the projects offer possibilities and opportunities that can be further explored in their own journey of designing and making.

Please email courses@argentium.com if you would like to offer the Argentium Silver Foundation Course to your students. We are also able to offer bespoke kits that can be tailored to suit any craft, design and technology programme, so please get in touch to discuss your requirements.

For individuals

Module kits, containing all the materials required for each project, can be purchased through the www.argentiumcourses.com website. When you receive your kit, simply enter the unique kit number onto the website to enrol onto the course and to access your video tutorials.

Assessments & recognition

Assessments for each Module are based on identified learning outcomes and carried out online (through the argentiumcourses.com website), where students are required to submit photographs that clearly demonstrate the quality of their finished products. A short tick-box questionnaire is also required to show understanding of each process. Help, support and constructive feedback will be offered.

Successful completion of each Foundation Module is recognised by Argentium Courses, in association with the Argentium Silver Guild and Argentium International Limited. Upon successful completion of the Foundation Programme, students will be awarded a Certificate and offered free membership to the Argentium Silver Guild, where they can continue to be supported and inspired on their Argentium Silver journey.

Contact us

For further information, please go to our website: www.argentiumcourses.com. If you have any questions, you can call or email us and one of our Argentium Silver experts will be happy to assist you.
